PROJECTS

■ Data Analysis & Visualization Projects

○ Media Sentiment and Tourist Arrivals in Ethiopia: A Data-Driven Analysis

- Built an end to end data pipeline integrating The Guardian API and tourism datasets (1996–2021), using GPT-4o-mini for automated sentiment and topic classification. Analyzed the relationship between media coverage and sentiment with tourist arrivals using linear regression and developed an interactive Streamlit dashboard to visualize results.

○ Pass xG Analysis (Premier League 2024/25)

- Cleaned and analyzed event-level Wyscout match data using Python and Pandas to estimate expected goals (xG) contribution from passes across different player positions. Built statistical analyses and visualizations to identify passing patterns associated with shot creation and goal-scoring opportunities.

○ Real Madrid Defensive Transition Analysis

- Developed a Streamlit application using event and SkillCorner tracking data to analyze Real Madrid's defensive structure during transitions after possession loss, to evaluate defensive organization, player positioning, and opponent threat.

○ Defensive Transition Analysis Bot (Premier League)

- Developed an AI-powered football analytics chatbot using tracking and event data to analyze defensive transitions after possession loss through compactness, defensive area, defenders behind the ball, and opponent threat metrics. Converted z-score-based tactical data into natural-language summaries and conversational analysis using LLMs.

○ Bruno Fernandez's Pass and Assist Analyser

- A Streamlit platform designed to analyse and compare Bruno Fernandez's pass and assists stats with other players, specifically Kevin De Bruyne, in the EURO 2024 league..

■ Web & System Development

○ Kuncho - Kids' entertainment platform

○ PAS- AAU Dormitory management system

○ SMOOL - School management system

○ YeBen Endowment Fund website - wordpress website

AWARDS & CERTIFICATES

- **AAU Certificate of Recognition for Outstanding Student** - awarded for ranking first among female students in AAU, CNCS.
- **Greater South Fair for Endogenous Technologies (GreSFET)** - contributed to the development of Smart Management for Optimized Organization and Learning (SMOOL).
- **YeBen life skills and leadership training** - completed a month long training program focused on leadership, financial literacy, effective communication, and other core life skills.
- **KMUSSC scholarship recipient** - awarded a high school scholarship at Kotebe Metropolitan University Science Shared Campus for scoring in the top 1% on Ethiopia's Primary School Leaving Certificate Examination.
- **Soccermatics Pro 25/26 Certificate of Achievement** - successfully completed a data science course (Soccermatics Pro) through a scholarship provided by CoreAI and Twelve.

EDUCATION

Addis Ababa University

May 2022 – June 2025

BSC, Computer Science– CGPA 3.94/4.0, Summa Cum Laude

Addis Ababa , Batch Representative

- Relevant Coursework: Statistics, Probability Theory, Linear Algebra, Data Structures & Algorithms, Applied Numerical Analysis

WORK EXPERIENCE

Vivid Insights

Apr 2026 - Present

AI Engineer

Addis Ababa, Ethiopia

- Designed and built a full-stack AI powered cardiovascular health chatbot web application for African non-medical users using React, TypeScript, Tailwind CSS, Python, and FastAPI
- Transformed a cardiovascular risk calculation model trained on approximately 70,000 patient records into a deployed, user facing chatbot platform
- Integrated Azure OpenAI and Google Gemini APIs to generate plain English cardiovascular risk explanations and health summaries

KAKI Motors

Sep 2025 - Present

Junior parts planning and monitoring officer

Addis Ababa, Ethiopia

- Analyzed sales and inventory data to support forecasting and optimize stock planning
- Built and monitored interactive dashboards (Excel, Power BI) that track stock levels, sales trends, and order fulfillment
- Developed a Parts & Service CRM system to track requests, branch performance, and service coordination
- Designed a summary dashboard to monitor branch performance, and contribution to overall business outcomes
- Developed and automated internal tools, including:
 - Weekly Review system for KPI tracking of all branches
 - Parts picker & consolidator tool to streamline order preparation
- Designed inventory checkup and tools audit systems to improve data accuracy and accountability
- Performed data cleaning, validation, and structuring to ensure reliable reporting, and automated reporting workflows and supported ERP system integration

Origin Logistics PLC

Aug 2024 - Aug 2025

Computer and network administrator

Addis Ababa, Ethiopia

- Monitored and maintained network performance and stability
- Troubleshoot hardware, software, and connectivity issues
- Maintained reliability and continuous operation of internal systems and digital tools

YeBen Endowment Fund

May 2024 - Oct 2024

Lead Web developer and Digital Marketing manager

Addis Ababa, Ethiopia

- Redesigned and developed the organization’s website to create a clean and user-friendly layout in order to increase their engagement
- Volunteered to plan and manage digital campaigns to promote the organization’s mission and activities and increase their online engagement and visibility

SKILLS

- Data & Analytics: Excel, Google Sheets, Power BI, Python(Pandas, NumPy)
- Programming: Python, JavaScript, C++, Java, PHP
- Databases: PostgreSQL, MySQL, MongoDB
- Web & Design: CSS, Figma, Canva
- Tools: Git, Notion, Jira, Slack

Languages

- Amharic - Native or bilingual proficiency
- English - Full working proficiency
- Korean (South) - Basic conversational proficiency
